PROFESSIONAL EXPERIENCE

Santander Tecnología Argentina

Software Engineer

SEPTEMBER 2023 - MAY 2026

- Developed and deployed large-scale features within the Investment Tribe, leading the implementation of Microfrontends-based architectures with React and TypeScript for corporate fund management.
- Developed a critical digital signature system for corporate operations and fund redemption scheduling, optimizing investment flows for business clients and ensuring high availability.
- Ensured observability, quality, and infrastructure of deployments using OpenShift, Kubernetes, Grafana, Dynatrace, SonarQube, and secret management workflows.

Tsoft

Frontend Web Developer

OCTOBER 2021 - SEPTEMBER 2023

- Actively contributed to the development and evolutionary maintenance of the official Tuenti application, using React, React Native, and TypeScript within Telefónica's corporate infrastructure.
- Created and consumed APIs in Node.js and integrated CI/CD pipelines in OpenShift/Kubernetes environments, ensuring software quality through automated testing and performance optimization.

Netglobal Solutions S.A.

Software Engineer / Frontend Developer

JULY 2020 - OCTOBER 2021

- Integrally designed and developed (from Figma to UI/UX implementation) the main dashboard for DirecTV's critical fleet management system, using React, Angular, and TypeScript.
- Componentized the frontend architecture and renewed the look & feel, modernizing legacy CSS design and optimizing application performance and loading speed by 30%.

PROFESSIONAL PROFILE

Full Stack Developer with over 10 years of experience building scalable, modern web applications centered on user experience.

Specialized in React, Next.js, NodeJs, and Laravel, combining frontend and backend development with product vision to create solid, maintainable, and business-focused solutions.

Experience working on financial platforms, CMSs as Wordpress and Elementor, enterprise systems, and high-performance applications.

Incorporation of AI-assisted tools and workflows to optimize development processes and technical productivity.

Experience in enterprise environments using Grafana, OpenShift, Kubernetes, Docker, Dynatrace, SonarQube, and CI/CD pipelines.

SKILLS

Frontend: React, Next.js, Vue.js, Angular, AngularJS, TypeScript, JavaScript, TailwindCSS, Redux

Backend: Node.js, Express.js, Laravel, PHP

Databases: MySQL, MongoDB, Redis

DevOps & Infrastructure: Docker, Kubernetes, OpenShift, CI/CD, Git

Quares IT Solutions

Frontend Developer

SEPTEMBER 2019 - JULY 2020

- Developed critical applications and frontend functionalities for high-relevance accounts such as Experta Seguros, including the integration of WordPress and Elementor-based solutions, collaborating closely with product teams under agile methodologies.
- Optimized UI/UX for client systems, achieving a 20% improvement in loading speed and platform performance.

Xyclon

Full Stack Web Developer

AUGUST 2018 - SEPTEMBER 2019

- Developed internal full-stack applications using PHP, Laravel, and React for international accounts in Brazil, highlighting system design for Natura.
- Managed database migration and backend/frontend (UI/UX) improvements, reducing technical debt and optimizing platform efficiency by 25%.
- Contributed to WordPress and Elementor-based projects and maintenance.

WebFindYou

Team Leader | Front End Developer

OCTOBER 2016 - APRIL 2018

- Developed modern interfaces (UI), interactive components with React, and high-fidelity layouts with a strict focus on responsive design and mobile compatibility.
- Designed and optimized features for the agency's proprietary CMS, improving content management efficiency and integration of critical APIs.
- Built web ecosystems for regional marketing campaigns, including high-conversion landing pages, dynamic forms, and email marketing pieces, ensuring optimal loading performance and SEO.
- Resolved critical incidents and executed evolutionary maintenance of databases and web services, guaranteeing the stability of clients' active platforms.

Front End Developer

JUNE 2015 - OCTOBER 2016

- Developed React components and responsive layouts with a strict focus on mobile-first UI/UX.
- Optimized the agency's proprietary CMS, accelerating the consumption of critical APIs by 15%.
- Built over 100 landing pages and marketing pieces, ensuring optimal loading performance and SEO.
- Resolved critical incidents, ensuring 99% availability of client platforms.

Observability & Quality: Grafana, Dynatrace, SonarQube

Tools & Management: Wordpress, Elementor, Jira, GraphQL, REST APIs, Agile, Scrum

Mobile: Flutter

EDUCATION

UNEFA, Systems Engineering —
Systems Engineer 2009 - 2014

LANGUAGES

English: Professional / B2+

PROJECTS AND PUBLICATIONS

SpaceX Launch Tracker: End-to-end application developed with Next.js and Tailwind CSS. Includes API integration and a documented case study on personal blog.

Hotel Booking System: Solution for stay management built with Vue.js and Vite, optimizing business logic and loading speed.

Custom CMS: End-to-end development from Figma design to functional code using CodeIgniter and Materialize, allowing for personalized content management.

Technical Articles (AI): Author of publications on optimizing the development lifecycle through the use of AI tools like GitHub Copilot and Gemini.
